

SATYA TRIPATHI

Senior Staff Engineer | Engineering Leader | Solution Architecture & Technical Leadership

Hyderabad, India · satya06.official@gmail.com · linkedin.com/in/isatyatripathi · isatyatripathi.github.io

PROFESSIONAL SUMMARY

Senior Staff Engineer at Experian with 10 years in software engineering - 8+ of them building and modernising high-traffic, customer-facing fintech platforms on .NET, AWS, and Azure. Line-manage a distributed UK-India team of 9 engineers and mentor 10+ across teams; own solution architecture for digital identity and scoring-platform modernisation, including event-driven AWS pipelines migrating legacy batch workloads. Shipped 30+ mission-critical production releases with zero rollbacks, cutting release time-to-market by 89% and production failure rate by 91% through shift-left engineering. Led the governed adoption of AI-assisted engineering (Claude, GitHub Copilot) on a regulated platform; recognised by the CPO and CTO with multiple awards.

CORE SKILLS

Leadership: Engineering Management · Line & People Management · Mentoring & Coaching · Cross-Team Design Reviews · Stakeholder Management · Agile Delivery

Architecture & Practices: Solution Architecture · Microservices · Distributed Systems · Event-Driven Architecture · REST APIs · System Design · CI/CD · Shift-Left Testing & Test Automation · Cloud Migration

Technology: C# · .NET 8/10 · ASP.NET Core · React · Entity Framework Core · SQL Server · xUnit · Docker

Cloud: AWS (Step Functions, Glue, Lambda, S3, EventBridge, IAM, cross-account / cross-region architecture) · Microsoft Azure (App Service, Functions, Azure SQL)

AI-Assisted Engineering: Claude · GitHub Copilot · Prompt Engineering · AI usage governance & guardrails

PROFESSIONAL EXPERIENCE

EXPERIAN

Hyderabad, India

Senior Staff Engineer

Sep 2024 – Present

Lead distributed Agile .NET development teams across the UK and India, delivering C# REST API services for Identity & Fraud clients.

- Provide line management, coaching, and career development for a team of 9 developers (graduate to senior), while mentoring 10+ engineers across teams and helping them progress into senior roles.
- Own solution architecture and technical direction for digital identity, fraud, and scoring-platform modernisation initiatives; present designs at architecture review boards, lead cross-team design reviews, and set engineering standards.
- Partner with cross-functional engineering and business stakeholders to align priorities, manage dependencies and technical risk, and deliver mission-critical production releases.
- Lead legacy-to-cloud modernisation across Azure and AWS, architecting the migration of mainframe batch workloads to event-driven, idempotent pipelines (Step Functions, Glue, Lambda, EventBridge, S3) with secure cross-account, cross-region data delivery.
- Champion shift-left engineering through code reviews; automated unit, load, and performance testing; CI/CD; and quality-focused release controls.
- Lead the responsible adoption of Claude and GitHub Copilot for AI-assisted development, code review, and test generation, defining usage and governance guardrails for a regulated environment.
- Recognised by senior leadership, including the CPO and CTO, with multiple awards for technical leadership and delivery on mission-critical initiatives.

Senior Software Engineer

Jul 2021 – Sep 2024

- Developed new product features for the high-volume web application on .NET 6 and .NET 8, delivering 32 consecutive releases with zero rollbacks.
- Standardised and documented solution architecture and release patterns for the mission-critical customer-facing portal, cutting release time-to-market by 89% while ensuring high code maintainability.
- Designed and implemented new API endpoints for a high-volume single-page application, improving system cohesion while keeping code complexity manageable in a microservices architecture.
- Reduced the production failure rate by 91% by building automated unit (xUnit), load, and performance test suites for the critical online service using Robot and mocking frameworks.
- Improved the aesthetics and UX of the business-critical progressive web application, increasing the Customer Happiness Index (CHI) by 73%.
- Designed and documented the migration approach for legacy applications from on-premises servers to AWS.

Software Engineer

Apr 2020 – Jul 2021

- Developed and maintained features for Experian's high-volume, customer-facing web applications using C#, .NET Core, and React within an Agile team.
- Contributed to REST API development, unit testing with xUnit, and CI/CD-based releases — platform work that led to promotion to Senior Software Engineer within 15 months.

INFOSYS

Hyderabad, India

System Engineer • Client: Charles Schwab

Jul 2018 – Apr 2020

- Developed microservices using 12-factor methodology and dependency injection to keep systems loosely coupled.
- Designed and configured a fully automated CI/CD lifecycle for a high-volume online service, reducing time-to-market and improving deployment reliability.
- Developed and deployed .NET Core web applications on Azure PaaS (App Service, Functions, Azure SQL) and Pivotal Cloud Foundry, ensuring minimal downtime.
- Built data access with Entity Framework Core and LINQ, designed backend stored procedures, and conducted performance testing and optimisation.

Earlier: Intern, Infosys — Mysore (Feb 2018 – Jun 2018).

FREELANCE SOFTWARE ENGINEER

Noida, India

Independent Consultant

Feb 2016 – May 2018

- Designed and built an internal management portal for a travel company using Angular and ASP.NET MVC, centralising operational tracking and improving visibility across key business processes.

ACHIEVEMENTS

- Won 3 Experian Product Hackathons for designing and implementing innovative, robust product solutions.
- Received 8 Experian Spot Awards for collaboration with product stakeholders across releases.
- 4× Infosys Insta Award and Rising Star Award for delivery excellence and organisational contributions.
- Published IEEE paper: "Study on Secured Framework for Cloud-Based Online Banking."

EDUCATION

B.Tech, Computer Science & Engineering (Specialisation in Cloud Computing) — Galgotias University

2014 – 2018

CERTIFICATIONS

- Microsoft Certified: Azure Developer Associate (AZ-204)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Infosys Certified Agile Developer
- Public & Hybrid IaaS Cloud with OpenStack
